

**10 out of 10 doctors agree Blood Oxygen Level & Heart Rate are best for daily screening of people for COVID-19 symptoms compared to just screening for fever using forehead temperature.**

**EARLY DETECTION,  
LESS INFECTION.**

## THE WORLD'S FIRST **NON-CONTACT BLOOD OXYGEN SENSOR**

When re-opening the world/country/state/business, you want the highest level of technology to ensure safety.

Patent Pending

SymptomSense™ is the world's first Rapid Health Body Scanner. It detects four key vitals:

- Blood Oxygen Level
- Temperature
- Heart Rate
- Respiration Rate

### **MEDICAL ADVISORY BOARD**

"We have learned from the COVID-19 pandemic that we must be much more vigilant and leverage technology to keep the public safe and stop the rapid spread of disease. SymptomSense™ creates an early warning system that will aid in reducing the community spread of viruses including the flu as well as other illnesses," said PK Carlton, Jr, Lt Gen (Ret) USAF MD, FACS, and former Surgeon General of the U.S. Airforce, and now distinguished member of the Advisory Board of Soter Technologies.
